

SYSTEM COMBATIBILITY

NEW TECHNOLOGY YOU CAN USE WITH OLD TECHNOLOGY.

Unique to Metabo! The new Li-Power battery pack fits into all tools of the AIR COOLED generation. Those who already enjoy the benefits of the best charging technology around today can add the power and durability of Li-Power to their existing AIR COOLED cordless machines. Another plus: No matter which Metabo batteries you are currently using, they fit without any problem into the AIR COOLED chargers. For you, this means: shorter charging times without high conversion costs. Metabo Lithium ion batteries should **ONLY** be charged in Metabo Lithium ion chargers, i.e. the AC 30 Plus and ACS 15 Plus.

LI-POWER BATTERY PACKS CAN ALSO BE USED WITH ALL APPLIANCES OF THE AIR COOLED GENERATION!
